1. Claims 1-23 are presented for examination.

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 14-16 are rejected under statutory type (35 U.S.C. 101) double patenting as claiming the same invention as that of claims 11-13 of prior U.S. Patent No. 6,405,335.

4. The non-statutory double patenting rejection, whether of the obviousness-type or non-obviousness-type, is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent. *In re Thorington*, 418

F.2d 528, 163 USPQ 644 (CCPA 1969); *In re Vogel*, 422 USPQ 761 (CCPA 1982); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); and *In re Goodman*, 29 USPQ2d 2010 (Fed. Cir. 1993).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(b) and 8 may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.78(d).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-13 and 17-22 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. patent no. 6,405,335. Although the conflicting claims are not identical, they are not patentably distinct from each other because the scope of the claimed subject matter in claims 1-13 and 17-22 of the instant application is broader than the scope of the claimed subject matter in claims 1-19 of U.S. patent no. 6,405,335. Omission of an element and its function is obvious if the function of the element is not desired. Representative independent claims 17-19 of the instant application will be taken as an example in view of claims 14-16 of U.S. patent no. 6,405,335.

Claim Rejections - 35 USC ' 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 23 is rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Crouch et al. (Crouch) patent no. 5,592,493.

8. As to claim 23, Crouch teaches the invention as claimed, including a process of manufacturing an integrated circuit [see Fig. 1] comprising:

forming a core circuit [cores 12-22] on an integrated circuit to have functional parallel data input bus [connection bus from test controller 10 to cores 12-22] and a functional parallel data output bus [connection bus from cores 12-22 to MUX 24];

forming at least one test data input [STDI] on the functional parallel data input bus; and

forming at least one test data output [STDO] on the functional parallel data output bus.

Conclusion
